MARCH EMPLOYEE'S BIRTHDAYS

31st - Jessica Adams (Medical Assistant)

What's New?

Festus Clinic Move!

You can see Dr. Douglas Basso every **Wednesday 9am-4pm in Festus, MO**, however, his clinic is now located at the North Side of the building, instead of the South end. You can now find his clinic in Suite 40G. Please do not hesitate to call if you need help with directions.

Hammertoe

A **Hammertoe** is a deformity of the second, third or fourth toes. In this condition, the toe is bent at the middle joint, resembling a hammer. Left untreated, hammertoes can become inflexible and require surgery. People with hammertoes may have corns or calluses on the top of the middle joint of the toe or on the tip of the toe. They may also feel pain in their toes or feet and have difficulty finding comfortable shoes.

Causes of hammertoe include improperly fitting shoes and muscle imbalance. Treatment for the condition typically involves shoes with soft, roomy toe boxes and toe exercises to stretch and strengthen the muscles. Commercially available straps, cushions or non-medicated corn pads may also relieve symptoms.

Does having Athlete's Foot qualify me as sporty?

FUN FOOT FACT

Children's feet do grow incredibly fast, especially during the first few years. It breaks down like this:

- Birth to 12 months, kids' feet go up five sizes
- From 12 to 24 months, kids' feet go up two sizes
- From 24 to 36 months, kids gain another two shoe sizes

That means that kids' feet go up nine sizes in their first three years alone. Once they hit 4 years old, their shoe size shouldn't change more than once every 8 to 12 months.
